# Goals

Project: (HTH) Student/Family Engagement

**Objective:** To create strategies and interventions that would help not just the student but their family as well in making normalcy out of our current normal.

# Theory + Practice

- How did your understanding of theory inform your practice?

The current climate at the moment is filled with a lot of unknowns and frustrations. In order to allow the opportunity for implementations or strategic interventions and be able to support this situation through shared vision and purpose, I am collaborating with a colleague with the hope that this research will provide the knowledge and expertise required to develop a professional skill that helps with better understanding the challenges our students are facing.

# Equity Analysis

- How did your awareness of equity issues inform your leadership work?

Even though the research is in its beginning phase, my colleague and I are making sure that our empathy interviews and dialogue reflects strategic social and emotional supports that incorporates culturally responsive practices.

# Reflection

What worked well? It is difficult at this time to give an assessment on what worked well, but we are curious to examine the outcome.

What was challenging? We know there will be challenges and we are prepared to encounter them and learn from them.

What would you do differently next time? We know one size does not fit all and for us to continue in liberatory work and promote social change, we are going to look very closely at our process as well as data collected.

How might this work inform your future actions? The hope from this research is that it will help us not only elevate students and their families voices regarding their needs and support, but also bridge the gap of social injustice and inequity when it comes to student and family engagement.

What questions were raised for you? Nothing to report at this time.

# Evidence

Nothing to report at this time.
